

UPFUL FEATURES GUIDE

1) User joins our platform. Username, Profile Picture, and PayPal email is required. In addition, we need to secure their accounts with a password. Here it should be displayed if they would like the free version or the \$6.99/month version (free version does not allow for monthly payouts). ALL PAYOUTS WILL BE MONTHLY– it is an aggregate of their daily positions, weekly positions, and monthly positions.

2) If the user selects the subscription– this should prompt. If the user selects free version, they will be prompted to the home page (their portfolio as displayed below).

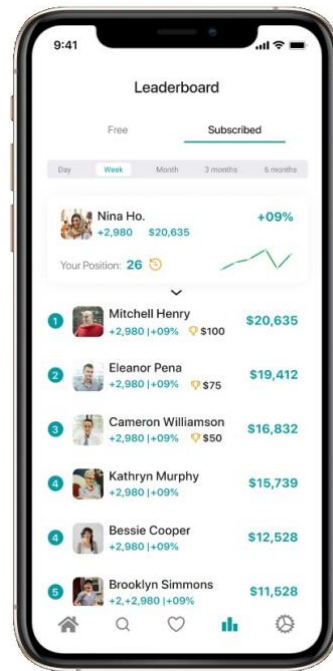

UPFUL FEATURES GUIDE

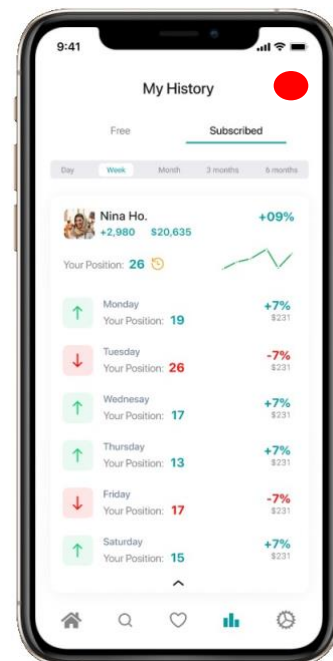

3) User who is both FREE and PAID can view leaderboard. The user will not be able to see their exact portfolio— just their % growth from the 25,000 and the total portfolio value. It is important to include the username and their position. Since we are tracking daily data, we should display top 100 in daily, weekly, monthly, quarterly, and 6 months.

This page will include your rank in each competition and the same metrics as others (% growth and current portfolio value). The line graph is reflective of the users' % fluctuation in their portfolio.

The Free Tab will display the same leaderboard except with just the FREE users. Please add feature in the free version that displays how much a free user COULD have made if they paid for the subscription (build it out the same as the subscribed leaderboard but this list only includes free users and what their payout could have been).

4) This page will be accessed by having a feature added in the top right corner to either see leaderboard of all contestants or see the users' position history (see red circle for that filter option). This will display daily, weekly, monthly, quarterly, and 6-month standings. Similar to the 3rd feature, the same metrics will be shown except this will show that users' standing. Instead of using "Monday, Tuesday, etc." we will use the recorded date as "Jan 12, 2021" and "Feb 20, 2021". This will provide a more trackable format.

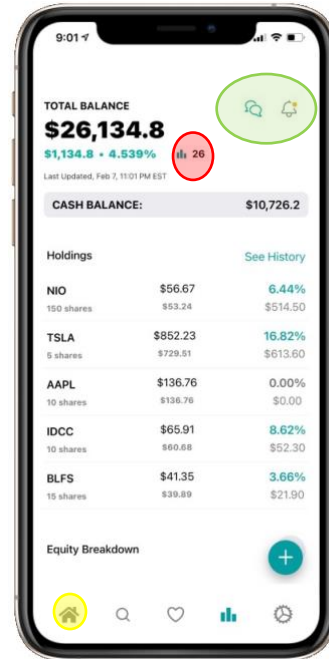

Filter should be two options "Leaderboard" and "My History". Leaderboard displays feature #3. My history displays historic record of the users' positions in each competition.

UPFUL FEATURES GUIDE

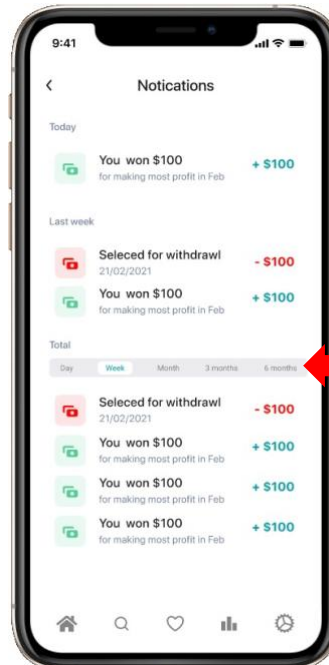

5) This page will be the new home icon (see yellow marker). The only addition that should be made to this page is the current monthly position (see in red). And the messages + notifications (see green). The notifications will be highlighted in the next feature. The notification feature will have an orange mark on it to notify the user of his positions in the daily, weekly, and monthly competitions. Ensure that the portfolio value growth and the portfolio % growth are displayed. The “Last Updated” feature is already incorporated into the current app.

Both free and paid versions will have the current standings.

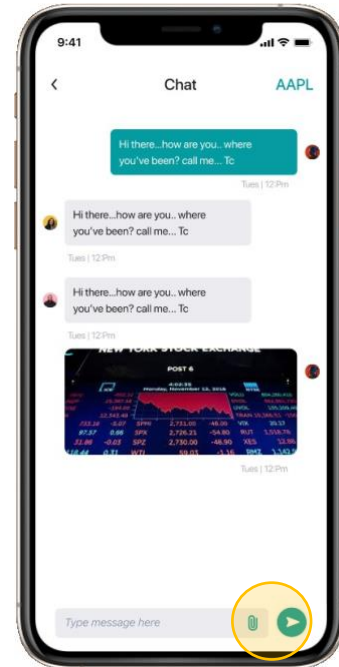

6) This page will display the notifications. You can access the notifications on the home tab. In feature 5 the notifications tab can be accessed in the top right corner (see green marker). This page will display that users' current payouts for every competition. They can filter out by day, week, month, 3 months, and 6 months (see red arrow). It would be nice to show their aggregated payout for that current month so they can see everything that will be paid—including all daily and weekly competitions. It is important to note that we will not be doing 3 months' and 6 months' payouts for when we first start.

For free users, it should display how much they could have won if they subscribed. Call it “What you missed out on”

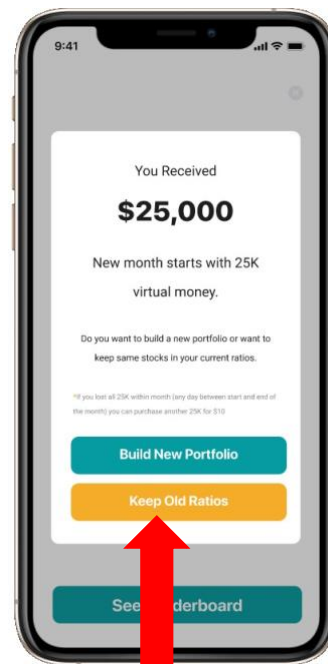

UPFUL FEATURES GUIDE

7) This page will be accessed from the home page (green marker on feature 5) on the top right corner. This will open up a conversation with ALL traders. This function will only be reserved for paid subscribers as this can be a premium feature. Any paid subscriber can use this feature and talk (dating back to 3 months of history). Instead of a # function to filter out information, the filter can be accessed in the top right corner where the user can filter out the conversation by ticker. This feature can allow for photo attachments and basic messages (see orange marker). Users will use the ticker symbol in chat– we will use these tickers as the filters to pull up those

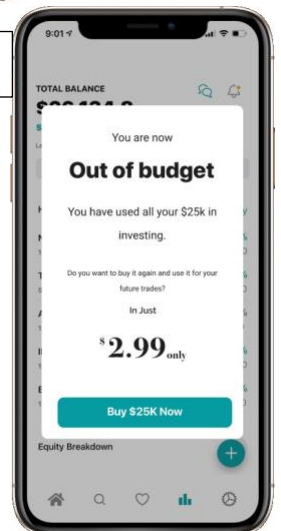

8) After each month the competition will reset. The user will carry over their current funds but their portfolio % growth will be set at 0%. The user will have the opportunity to either keep their current shares or start from scratch. If the user has a value below \$10,000.00, they have the option to buy more cash which will be features 9 and 10. The price for this feature will be \$2.99.

It is important to note that if the user selects “Build New Portfolio” that they will start with \$25,000 regardless of their prior months’ portfolio value.

Should be “Keep Old Portfolio”, not “Keep Old Ratios”
